WALKABLE FOOTPRINT PAPER

FOOTPRINT FOR THE MEASUREMENT OF THE FOOT PRESSURE

The WALKABLE FOOTPRINT PAPER enables practitioners to quickly but precisely analyse the distribution of pressure applied on the plantar aspect of feet.

FOOT POSTURE

When a footprint is taken, the practitioner is able to observe the position of the feet and to diagnose the degree of excessive pronation. The footprint will highlight areas of excessive pressure providing useful information to the practitioner in how to successfully treat the biomechanics of the patient.
